

Planes improved

- create list of seating
- e plus can choose seat
- if not e plus can ~~also~~ have a locked number together
 - ↳ ex. signs in w/ unassigned and will be assigned later
 - ↳ is fam of 3.
 - ↳ algorithm sees 3 if booked/bought
 - + box is checked group then seats must be adjacent or at least across an aisle.
- single passengers get populated throughout where blocks are unassigned.

This should improve the issue of family seating. But I wonder if this will impede how singlets are seated equitably?
